

## How to Make a Ballantine Coil

In this [#TallShipTuesday](#), Deckhand Jessie taught you how they Ballantine Coil to celebrate Valentine's Day. Follow along with this guide to make your own.

Have a deck coil ready and lay the bitter end down on the deck

Make 3 circles clockwise

Create a bite that will take up about 1/3 of the circle

Overlapping each other in the center, lay out 2 more small circles that each take up about 1/3 of the space

You can repeat the 3 small circles a few more times creating more layers, but for each layer add one big circle. E.g. 2 layers of small circles = 2 layers of big circles

Repeat until there is no more line to lay down
